**TANYA J. BATCHELDER, REGISTRAR**

---

May 15, 2018

The Coos County Registry of Deeds is pleased and excited to announce that we will be upgrading our computer systems beginning on June 1, 2018. Several other NH counties have already finished their upgrades to a new system and are very happy with the results. This new system is called AVID and it will be used for recording and indexing documents.

In addition to the new recording software, there will also be new search engines. These will change the way the public can view and search our records. The new search products have more features, are more secure and should prove to be a beneficial change.

This is a necessary upgrade from the present Connor & Connor system which has been in place for a very long time. The Connor system was designed using the most up-to-date technology available at that time; it was built on the JAVA platform which has several security issues; and the person who developed and wrote the Connor system has long since retired. Trying to keep the current system up and running is just not possible.

To make this transition as smooth as possible, Fidlar Technologies will be providing training to our staff and also training for our users.

Technology is ever changing and we are excited to be able to offer these new products. This move will allow Coos County Registry of Deeds to better serve our customers for now and into the future.

Please feel free to contact us with any questions you may have about these upcoming changes.

Best Regards,

Tanya Batchelder, Register
